How Criminal Investigations Can Be Expedited Using Facial Recognition

Across the nation, Law Enforcement Organizations (LEOs) are inundated every day with photographic and video evidence in their Criminal Investigation Divisions (CID). Numerous agencies have shared with me that in more than 30% of their CID cases the ONLY evidence they have is a photo or video of an unknown suspect, received from a variety of sources, including surveillance cameras, …

The Fate of Airport Customer Service Isn't Terminal

Today's air travel is marred by long lines, time-consuming security checks, and constant stress. Travelers are queued up at the check-in counter, at the self-service kiosk, when they drop of their bags, when they navigate the TSA screening lines and when they board the plane. However, these necessary security checks waste precious passenger time and impact an airport's bottom lines. …
